

Test Protocol for Initial Review

This document serves as the documentation for the initial inspection of the ZapBox, during which the tests performed and the parameters checked ensure the quality and functionality of the device. The ZapBox undergoes a comprehensive initial inspection at a test station, where the functions and parameters of the device are carefully examined to ensure quality and reliability.

Device Identification

ZapBox Type: _____ Serial Number: _____ Housing Version: _____

Base Color: _____ Front: _____ Button: _____ NFC Module: _____

Other / Special Features: _____

Note: For each ZapBox type, the relevant tests are marked with an "O". Each version has options. If not applicable, please mark with *n.a.* for *not available*.

Abbreviations:
I = Current / U = Voltage / Term. = Terminal / GPIO = General-Purpose Input/Output

Inspection of ZapBox with Display (T-Display-S3)

Test Object \ Type	Compact	Duo	Quattro	ZapOMat	Servo	Hybrid
I-Input USB-C (idle)	-	-	-	____A	____A	____A
U-Output Term.1-2 (idle)	-	-	-	____V	____V	____V
U-Output USB-A/C (switched)	____V	____V	-	-	____V	____V
Relay Channel 1 (GPIO Pin 12)	-	O	O	O	O	O
Relay Channel 2 (GPIO Pin 13)	-	O	O	O	-	O
Relay Channel 3 (GPIO Pin 10)	-	-	O	O	-	O
Relay Channel 4 (GPIO Pin 11)	-	-	O	O	O	O
Servo Channel 2 (GPIO Pin 13)	-	-	-	-	O	O
Servo Channel 3 (GPIO Pin 10)	-	-	-	-	O	O
Sensor Term.11 (GPIO Pin 2)	-	-	-	O	O	O
Display	O	O	O	O	O	O
OnBoard-Button	O	O	O	O	O	O
LED-Button	-	O	O	O	O	O
Side Cover	O	O	O	O	O	O

Test Object \ Type	Compact	Duo	Quattro	ZapOMat	Servo	Hybrid
Snap-Fit Mounting	O	O	O	O	O	O
NFC Module	O	O	O	O	O	O

Inspection of ZapBox Headless (ESP32)

Test Object	Headless	Headless Servo
I-Input USB-C (idle)	___,___A	___,___A
U-Output Term.1-2 (idle)	-	___,___V
U-Output Term.1-2 (switched)	-	___,___V
U-Output USB-C (switched)	___,___V	-
Relay Channel 3 - Term.3 - (GPIO Pin 12)	-	O
Servo Channel 3 - Term.3 - (GPIO Pin 12)	-	O
Sensor 1 - Term.4 - (GPIO Pin 22)	-	O
Sensor 2 - Term.5 - (GPIO Pin 23)	-	O
LED-READY	O	O
LED-ACTION	O	O
Side Cover	O	O
Snap-Fit Mounting	O	O
NFC Module	O	O

Notes

 **NFC Module:** The NFC module may function and still be defective. The error can be identified by the high current consumption of over 0.3A in idle mode.

Inspection Result

Inspection Result: ☐ Passed / ☐ Failed

Other Defects: ☐ No / ☐ Yes — If yes, which: _____

Block Time  : _____ Inspector  : _____
